Summary

I am interested in the design and implementation of concurrent programming languages targeting scalable platforms such as many-core processors and compute clouds. My research spans programming models, compilers, static analysis, schedulers, threading systems, and memory management.

Education

PhD — Computer Science *May 2011 – Dec 2014*
Thesis Title: **Functional Programming Abstractions for Weakly Consistent Systems** Purdue University, USA
Advisor: Suresh Jagannathan

Master of Science — Computer Science *Aug 2008 – May 2011*
GPA: 3.94/4 Purdue University, USA

Bachelor of Engineering — Computer Science and Engineering *Aug 2004 – May 2008*
GPA: 9.55/10 PSG College of Technology
Anna University, India

Experience

Research Associate, University of Cambridge *Dec 2014 – present*
Advisor: Anil Madhavapeddy Cambridge, UK

Developing Multicore OCaml under the OCaml Labs initiative in the Computer Laboratory.

Research Assistant, Purdue University *Aug 2008 – Dec 2014*
Advisor: Suresh Jagannathan West Lafayette, IN, USA

My research focused on discovering new language abstractions and developing runtime system techniques to ease programming weakly consistent systems. To this end, I have built MultiMLton, a parallel and distributed extension of MLton Standard ML compiler and runtime and Quelea, a shallow extension of Haskell for declarative programming over eventually consistent data stores.

Teaching Assistant, Purdue University West Lafayette, IN, USA
Undergraduate C Programming (CS180) *Aug 2012 – Dec 2012*
Graduate Programming Languages (CS565) *Aug 2011 – Dec 2011*

My tasks included designing and evaluating weekly projects, office hours for one-on-one instruction, and grading.

Research Intern, Microsoft Research, Cambridge *Feb 2012 – May 2012*
Advisors: Tim Harris, Simon Marlow, and Simon Peyton Jones Cambridge, UK

I developed a concurrency substrate for Glasgow Haskell Compiler (GHC) to allow programmers to modularly implement user-level schedulers and concurrency libraries for Haskell threads in Haskell, without having to re-engineer critical runtime system components. The concurrency substrate is built around one-shot continuations and uses transactional memory for coordination.

Research Intern, Samsung Information Systems America (R&D) *May 2010 – Aug 2010*
Advisor: Daniel Waddington San Jose, CA, USA

I was part of the core team that developed SNAPPLE programming language – a safe and concurrent extension of C++ targeted at many-core processors. The task involved designing language extensions for concurrency, compiler extensions for safety, and a runtime for executing large number of lightweight threads. SNAPPLE was implemented as a veneer on top of C++ using LLNL Rose source-to-source compiler.

Intern, Advanced Numerical Research and Analysis Group *Dec 2007 – Apr 2008*
Advisor: Sankar Chnab Hyderabad, India

As a part of the Compiler Engineering group, I ported Kaffe, an open source Java VM to an embedded microprocessor ANUPAMA and a desktop processor ABACUS. Developed a lightweight threading subsystem, and implemented a JIT backed for ABACUS.

❖ Journal Publications

MultiMLton: A Multicore-aware Runtime for Standard ML *Nov 2014*
J2 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
Journal of Functional Programming (JFP), 24(6): 613 – 674

Efficient Sessions *Feb 2013*
J1 KC Sivaramakrishnan, Mohammad Qudeisat, Lukasz Ziarek, Karthik Nagaraj, Patrick Eugster
Science of Computer Programming (SCP), 78(2): 147 – 167
Invited paper

❖ Conference Publications

Declarative Programming over Eventually Consistent Data Stores *Jun 2015*
C7 KC Sivaramakrishnan, Gowtham Kaki, Suresh Jagannathan
International Conference on Programming Language Design and Implementation (PLDI)

Rx-CML: A Prescription for Safely Relaxing Synchrony *Jan 2014*
C6 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
Symposium on Practical Aspects of Declarative Languages (PADL)

A Coherent and Managed Runtime for ML on the SCC *Nov 2012*
C5 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
Many-core Architecture Research Community Symposium (MARC)
Best paper award

Eliminating Read Barriers through Procrastination and Cleanliness *Jun 2012*
C4 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
International Symposium on Memory Management (ISMM)

Composable Asynchronous Events *Jun 2011*
C3 Lukasz Ziarek, KC Sivaramakrishnan, Suresh Jagannathan
International Conference on Programming Language Design and Implementation (PLDI)

Efficient Session Type Guided Distributed Interaction *June 2010*
C2 KC Sivaramakrishnan, Karthik Nagaraj, Lukasz Ziarek, Patrick Eugster
International Conference on Coordination Models and Languages (COORDINATION)

Partial Memoization of Concurrency and Communication *Sep 2009*
C1 Lukasz Ziarek, KC Sivaramakrishnan, Suresh Jagannathan
International Conference on Functional Programming (ICFP)

❖ Workshop Publications

Migrating MultiMLton to the Cloud *Sep 2013*
W4 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
ML Workshop

Scalable Lightweight Task Management Schemes for MIMD Processors *Apr 2011*
W3 Daniel G. Waddington, Chen Tian, KC Sivaramakrishnan
Workshop on Systems for Future Multi-Core Architectures (SFMA)

The Design Rationale for MultiMLton *Sep 2010*
W2 Suresh Jagannathan, Armand Navabi, KC Sivaramakrishnan, Lukasz Ziarek
ML Workshop

Lightweight Asynchrony using Parasitic Threads *Jan 2010*
W1 KC Sivaramakrishnan, Lukasz Ziarek, Raghavendra Prasad, Suresh Jagannathan
Workshop on Declarative Aspects of Multicore Programming (DAMP)

❖ Technical Reports and Drafts

Composable Scheduler Activations for Haskell *Dec 2014*
T2 KC Sivaramakrishnan, Tim Harris, Simon Marlow, Simon Peyton Jones
Under consideration for Journal of Functional Programming (JFP)

Featherweight Threads for Communication *Nov 2011*
T1 KC Sivaramakrishnan, Lukasz Ziarek, Suresh Jagannathan
Purdue University Computer Science Technical Report – TR-11-018

❖ Talks

Functional Programming Abstractions for Weakly Consistent Systems *Dec 2014*
PhD Defense — Purdue University

Functional Abstractions for Practical and Scalable Concurrent Programming *Mar 2014*
Invited Lecture — Microsoft Research, Cambridge, UK

Rx-CML: A Prescription for Safely Relaxing Synchrony *Jan 2014*
PADL 2014 — San Diego, CA

Migrating MultiMLton to the Cloud *Sep 2013*
ML Workshop 2013 — Boston, MA

A Coherent and Managed Runtime for ML on the SCC *Nov 2012*
MARC 2012 — RWTH Aachen

Eliminating Read Barriers through Procrastination and Cleanliness
ISMM 2012, Beijing *Jun 2012*
Wrestling Wednesdays, Microsoft Research, Cambridge *May 2012*

Lightweight Concurrency in GHC *May 2012*
Wrestling Wednesdays — Microsoft Research, Cambridge

Efficient Session Type guided Distributed Interaction *Jun 2012*
COORDINATION 2012 — CWI Amsterdam

❖ Professional Service

- Program Committee member: SPLASH-MARC symposium, 2013.
- Artifact Evaluation Committee member: PLDI 2015.
- Reviewer: POPL, ICFP, ASPLOS, TLDI, Concurrency and Computation: Practice and Experience, Software: Practice and Experience.

❖ Awards and Recognitions

- Research Fellow, Darwin College, Cambridge, 2015–2018.
- Maurice H. Halstead Memorial Award for outstanding research in Software Engineering, Purdue University, 2014, $4,000.
- Best paper award at Many-core Architecture Research Symposium at RWTH-Aachen, 2012, $1,000.

- Invited paper in Science of Computer Programming, Vol. 78, Iss. 2 (Feb 2013).
- Glasgow Haskell Compiler (GHC) Committer.
- SIGPLAN PAC travel grant for PLDI 2012 and POPL 2014, $1,500 each.
- NSF travel grant for ICFP 2013, $2,000.
