Supervision Practicalities

Supervisor: “KC” Sivaramakrishnan
sk826@cam.ac.uk

Please read through the instructions carefully, and do let me know if you come across any bugs / mistakes in this document. If you have any difficulties or questions, do not hesitate to contact me. I am best contacted by email at sk826@cam.ac.uk. I aim to response to students within 24 hours.

1 Submitting supervision work

Submit work electronically by email to sk826@cam.ac.uk. This can be pdf or word documents, text files, source code, or scanned copies of handwritten work. When submitting source code, please ensure that you don't submit scanned copies of handwritten code.

If you have not finished your work by the deadline, submit it unfinished and then submit the remainder later. I cannot guarantee I will mark work submitted after the deadline.

2 Before supervision

Come prepared for the supervision, ensure that bring at least: your lecture notes as well as paper and writing instruments (or electronic equivalent).

3 Marking

Each question has been given a number 1,2 or 3. The meaning of these values is as follows:

1. This answer is very good and there are no particular issues with it.
2. This answer is ok but could be improved. Often answers will receive a 2 if they have provided a mostly correct solution but have failed to handle a few important corner cases.
3. This answer is not complete or is incorrect, we will discuss in the supervision and another answer to this question should be submitted in next week's work.
